DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Goldschlag et al. (hereinafter "Gold", US 6,108,644).

As per claim 1, Gold discloses a method for auditing forms, the method comprising:

- Issuing a request to provide a form identifier that is associated with a form (column
 8, lines 5-15, 57-60);
- Receiving the identifier at a host computer (column 8, lines 9-12, 59-65);
- Verifying with the host computer whether the identifier is a valid identifier for the form
 being used (column 8, lines 16-21, 65-67, column 9, lines 1-2);
- Logging an error if the identifier is not valid (column 10, lines 14-16, column 12, lines 17-20, 45-46, 55-56).

As per claim 2, Gold discloses a method as in claim 1, wherein the request is issued from a terminal having a processor that is in communication with the host computer, and further comprising logging an error if the identifier is not valid (column 4, lines 44-60).

Art Unit: 2157

As per claim 3, Gold discloses a method as in claim 2, wherein the request is sent from the host computer to the terminal (column 8, lines 57-59).

As per claim 4, Gold discloses a method as in claim 1, where the request is issued from a customer service operator over a phone (column 1, lines 19-25, column 2, lines 55-61, column 3, lines 55-63).

As per claim 5, Gold discloses a method as in claim 2, wherein the identifier is received at the host computer from the terminal (column 8, lines 9-12, 59-65).

As per claim 6, Gold discloses a method as in claim 1, wherein the host computer includes an associated database, and wherein the identifier is verified by comparing the identifier with a list of valid identifiers in the database (column 9, lines 23-26, column 10, lines 14-16, column 12, lines 17-20, 45-46, 55-56).

As per claim 7, Gold discloses a method as in claim 1, further comprising determining whether an appropriate form has already been ordered (column 10, lines 8-14).

As per claim 8, Gold discloses a method as in claim 7, wherein if an appropriate form has not been ordered, placing an order for an appropriate form (column 10, lines 14-18).

Application/Control Number: 10/032,796

Art Unit: 2157

As per claim 9, Gold discloses a method as in claim 8, further comprising evaluating whether the ordered form is received by a user (column 10, lines 8-14).

As per claim 10, Gold discloses a method as in claim 9, further comprising transmitting an identifier for a replacement form to the host computer (column 10, lines 8-20).

As per claim 11, Gold discloses a forms auditing system, comprising:

- A host computer (column 8, lines 9-12, 59-65);
- A database associated with the host computer, the database having a record of a set of forms and a valid identifier for each of the forms (column 9, lines 23-26, column 10, lines 14-16, column 12, lines 17-20, 45-46, 55-56);
- Wherein the host computer is configured to receive an identifier in response to a
 request to audit a form, and to verify whether the identifier is a valid identifier for the
 audited form by comparing the identifier with the identifiers in the database, and to
 produce a record in the database of the comparison (column 8, lines 16-21, 65-67,
 column 9, lines 1-2).

As per claim 12, Gold discloses a system as in claim 11, further comprising a terminal having a processor, wherein the terminal is configured to receive the identifier of the form being audited and to electronically send the identifier to the host computer (column 8, lines 9-12, 59-65).

Application/Control Number: 10/032,796

Art Unit: 2157

As per claim 13, Gold discloses a system as in claim 12, wherein the terminal is configured to produce an audit screen having a region for inputting the identifier (column 8, lines 5-10, 60-64).

As per claim 14, Gold discloses a system as in claim 13, wherein the terminal is configured to produce the audit screen based on information sent to the terminal from the host computer (column 8, lines 58-60).

As per claim 15, Gold discloses a system as in claim 11, wherein the host computer is configured to generate in error report if the identifier of the form being audited is not Valid (column 10, lines 14-16, column 12, lines 17-20, 45-46, 55-56).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
